

No. of Functional Features Included in the Solution

Date	29 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Input Form	HTML/CSS interface allowing users to input the 4 socio-economic metrics.	Frontend (UI)	Done	High
2	Input Validation	Validates user input before sending it to the prediction model..	Frontend / Backend	Done	Medium
3	Data Normalization	Scales and prepares user input for accurate prediction.	Backend Logic	Done	High
4	HDI Prediction Engine	Uses the trained Linear Regression model to predict the Human Development Index.	Machine Learning	Done	High
5	Prediction Result Display	Displays the predicted HDI score, development category, and input summary.	Frontend (UI)	Done	High
6	Flask Prediction Module	Processes user input and generates HDI predictions.	Backend (Flask)	Done	Medium
7	Sample Input Support	Provides predefined sample values to quickly test the prediction system.	Frontend (UI)	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	7
Total Features Implemented	7
Core / Must-Have Features	5 (User Input Form, Data Normalization, HDI Prediction Engine, Prediction Result Display, Flask Prediction Module)
Additional / Nice-to-Have Features	2 (Input Validation, Local Flask Application)
Features Tested & Verified	7

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	User Input Form, Prediction Result Display
2	Backend / Logic	3	Input Validation, Data Normalization, Flask Prediction Module
3	Machine Learning	1	HDI Prediction Engine
4	Application Integration	1	Flask–Frontend Integration
5	Application Execution	1	Local Flask Application
