

Project Demo Planning

Date	01 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the Human Development Index (HDI), its importance, and the objective of predicting HDI using Machine Learning.	1.5	Nikitha
2	System Architecture & Technologies	Explain the project architecture and technologies used (Python, Flask, HTML, CSS, Machine Learning).	1.5	Sindhu
3	Model Training & Prediction	Describe the dataset, preprocessing, model training, and how the trained model predicts HDI.	2.0	Gaya
4	Live Application Demonstration	Show the web application, enter sample values, generate the HDI prediction, and explain the results.	3.0	Bhavya
5	Conclusion & Future Enhancements	Summarize the project and discuss possible future improvements such as additional indicators and enhanced visualization.	1.0	Ishwarya

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the project and explain why HDI prediction is useful for measuring a country's development.
2	Solution Overview	Briefly explain the project architecture, machine learning model, Flask backend, and web interface.
3	Live Feature Demonstration	Enter sample development indicators, click Predict , and display the predicted HDI score and category.
4	Q&A Session	Answer questions about the dataset, prediction model, implementation, and future improvements.
