

Brainstorming & Idea Prioritization Template

Date	27 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Grandhi Neha Nikitha (24B05A0507 CSE)	Develop a machine learning model to predict the Human Development Index (HDI) using Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI Per Capita.	Machine Learning	1
2	Bhavya Sree Manam	Compare different regression algorithms and select the model with the best prediction accuracy.	Machine Learning	1
3	Ishwaryambica Ketha	Build a Flask backend to connect the trained model with the web application.	Backend Development	2
4	Geya Yallabandi	Design an interactive and responsive web interface using HTML, CSS, and JavaScript to collect user inputs and display prediction results.	User Interface	2
5	Sai Sindhusa Seelam	Deploy the application on Render and test it with different sample inputs to ensure correct predictions.	Deployment & Testing	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop an HDI prediction model using the most suitable regression algorithm.	High	High	1	Yes
2	Create a web application with Flask and an interactive frontend for HDI prediction.	High	High	2	Yes
3	Test the application using different input values and validate prediction results.	High	Medium	3	Yes
